DETAILED ACTION

Allowable Subject Matter

Claims 1-3,5-15,17,18 and 27-35 are allowed. Since claim 1 is allowed and generic, the previous restriction requirement has been withdrawn. Therefore, claims 19-21 and 24-26 are now rejoined.

Claims 1-3,5-15,17-21 and 24-35 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record either taken singularly or in combination fails to disclose an outer tube concentric with an inner tube, which has an axial flow passageway; circumferential fluid flow passage formed along the outer surface of the outer tube; a corrugated strip fins are arranged in the circumferential fluid flow in a low pressure drop orientation with rows of corrugation in the corrugated strip fins extending axially through the circumferential flow passageways and with apertures through the corrugations extending circumferentially (claims 1 and 27) and the heat exchanger includes at least one radially inner circumferential flow passageway and one radially outer circumferential flow passage; the flow communication between the inner and outer flow passageways is provided by a layer of perforated sheet material (claims 30 and 33).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
